PROFILE SUMMARY

Process automation professional with 3+ years of hands-on experience designing, debugging, and scaling enterprise hyperautomation solutions on the Bautomate platform. Deep expertise in BPMN workflow design, Camunda BPM script-task development (Groovy/JavaScript), RPA, AI-powered OCR, and LLM-integrated document extraction. Track record of resolving complex production issues across insurance, telecom, and retail automation pipelines while improving accuracy, compliance, and operational efficiency.

CORE SKILLS

BPMN Workflow Design • Camunda BPM (Groovy/JavaScript, Nashorn) • RPA (UiPath / Automation Anywhere) • AI-Powered OCR (Tesseract, PaddleOCR) • Document Management Systems (DMS) • LLM-Integrated Extraction • Form.io • JSON Data Integration (Microsoft Business Central) • Python • SQL & NoSQL • Process Optimization

WORK EXPERIENCE

Process Automation Engineer | *Vinga Software Solutions Pvt Ltd — Bautomate* **Jul 2023 – Present**

Bautomate: enterprise hyperautomation platform combining BPM, RPA, OCR, and LLMs

- Design and maintain BPMN-based workflows on the Bautomate platform, integrating RPA, AI-powered OCR, and LLM-driven content extraction for enterprise clients.
- Own script-task development and production debugging across Camunda BPM (Groovy/JavaScript/Nashorn) workflows for an insurance policy onboarding pipeline, including checkpoint validation, signature-detection enrichment, and audit-report generation.
- Resolved a Java/GraalJS interop defect in Jackson ObjectMapper deep copies by building custom map-key helper functions, restoring reliable enumeration in downstream scripts.
- Re-engineered a document extraction script to correctly parse and flatten page-keyed JSON output, adding backward-compatible fallback handling for legacy data formats.
- Diagnosed and fixed a variable-scoping defect in an Excel-based compliance audit report generator that was causing systematic column misalignment.
- Built and maintained Form.io UAT forms, resolving DMS datagrid download failures and conditional-visibility bugs in calculated fields.
- Delivered a data deduplication workflow for Malaysian utility billing (TNB) JSON records to improve downstream data quality.

KEY PROJECTS

Indus Tower — LLM-Enhanced Document Data Extraction

- Built a configurable content-capture layout for invoices, bills, and telecom documents, integrating LLMs to improve extraction accuracy and validation.
- Automated result calculation and compliance validation on extracted data, improving handling of diverse document structures.

EMart24 — End-to-End Invoice & Billing Automation

- Automated bill downloads via RPA and processed invoices using BPMN, converting extracted data into JSON.
- Integrated the pipeline with Microsoft Business Central, streamlining the invoicing and billing cycle end to end.

EDUCATION

M.Sc. Data Science — Bishop Heber College, Trichy — CGPA 8.2/10 — Department Topper **2021 – 2023**

B.Sc. Computer Science — Bishop Heber College, Trichy — CGPA 8.87/10 **2018 – 2021**
